'Gloss optics Wikipedia

July 14th, 2018 -

Standardisation in gloss
measurement was led by
Hunter and ASTM American
Society for Testing and
Materials who produced ASTM

D523 Standard test method
for specular gloss in 1939
This incorporated a method
for measuring gloss at a
specular angle of 60° Later
editions of the Standard
1951 included methods for
measuring at 20° for'

Scope Specular Gloss is a
measure of the light
reflected by the surface of

a material Gloss can be inherent in the material a result of the molding process or a result of surface texture Gloss can also be affected by environmental factors such as weathering or surface abrasion' 'ASTM D523 and ASTM D2457 Standard for Gloss Meter

July 12th, 2018 - The ASTM

D523 test method explains the measurement of gloss on non metallic samples for geometries of 20 60 and 85 degrees'

'ASTM D523 14 Standard Test Method for Specular Gloss

July 10th, 2018 - ASTM D523 08 Standard Test Method for Specular Gloss June 1 2008
ASTM International Gloss is

associated with the capacity of a surface to reflect more light in directions close to the specular than in others Measurements by this test method correlate with visual observations of surface shininess made at roughly the corresponding angles'
