### *Early Human Evolution Homo ergaster and erectus*

*May 2nd, 2020 - Evolutionary Relationships The earliest Homo erectus were contemporaries of the late Homo habilis in East Africa for several hundred thousand years This suggests that the immediate ancestor of Homo erectus was an early Homo habilis or possibly another yet to be discovered species of early humans Homo erectus was a very successful human species lasting at least 1 5 million years though'*

*'Jacques Ellul and the Technological Society in the 21st*

*May 1st, 2020 - About this book Introduction As one of the most significant twentieth century thinkers about technology Ellul was among the first thinkers to realize the importance of topics such as globalization terrorism munication technologies and ecology and study them from a technological perspective'*

### *'10 CHARACTERISTICS OF HOMO ERECTUS LORECENTRAL*

*May 3rd, 2020 - Characteristics of Homo erectus The Homo erectus already has the configuration of the body needed to walk up away from the simian and approaching the actual human being It is assumed that it could even run long distances All this seems to suggest that it is the direct predecessor of contemporary Homo sapiens The erectus also had a cranial capacity of 940 ml halfway between the gorilla'*

### *'Book Summary Homo Deus A Brief History Of Tomorrow*

*May 3rd, 2020 - In the book our full Homo Deus summary we elaborate on how societies have been anized around the same algorithms but different stories across the centuries why ancient Egypt Pharaohs are similar to big corporations Google and how our ability to create meaning and spin stories enabled us to create legal systems stock markets global trade etc'*
