'Frontiers Targeting DNA Methyltransferases in Urological March 22nd, 2020 - Urological cancers are a heterogeneous group of malignancies accounting for a considerable proportion of cancer related morbidity and mortality worldwide Aberrant epigenetic traits especially altered DNA methylation patterns constitute a hallmark of these tumors Nonetheless these alterations are reversible and several efforts have been carried out to design and test several epigenetic''The IDH2 R172K mutation associated with angioimmunoblastic

April 25th, 2020 - Mutations in isocitrate dehydrogenase IDH 1 and IDH2 contribute to malignant progression by producing the onetabolite 2HG In myeloid disorders mutations at three positions in these genes are monly observed but in angioimmunoblastic T cell lymphoma AITL IDH mutations are restricted to IDH2 arginine R 172 The plex microenvironment of AITL where malignant T cells prise a''Acute Kidney Injury Network definition of contrast induced

April 27th, 2020 - Acute Kidney Injury Network definition of contrast induced nephropathy in the critically ill between patients who developed CIN after their first CM injection and those who did not using the same univariate tests laboratoire de pharmacologie toxicologie CHRU de Tours and Dr Tàì Pham'

'A Five Year Study of the Incidence of Dyskinesia in

May 1st, 2020 - Original Article from The New England Journal of Medicine ? A Five Year Study of the Incidence of Dyskinesia in Patients with Early Parkinson s Disease

**'Les tests pharmacogénomiques The College of Family
April 30th, 2020 - Les tests pharmacogénomiques permettent
la détection de facteurs génomiques liés aux différences
dans la réponse à un médicament avant le traitement et ils
assurent que les bienfaits d'un médicament sont maximisés
sans entraîner des conséquences non intentionnelles des
RIM'**

**'Which placebo to cure depression A thought provoking
March 30th, 2020 - Antidepressants are often considered to
be mere placebos despite the fact that meta analyses are
able to rank them It follows that it should also be
possible to rank different placebos which are all made of
sucrose To explore this issue which is rather more
epistemological than clinical we designed an unusual meta
analysis to investigate whether the effects of placebo in
one situation are'**

**'Sphingosine 1 phosphate signaling through its receptor
May 1st, 2020 - 1 CNRS Institut de Pharmacologie et de
Biologie Structurale 31400 Toulouse France 2 Université de
